Validated Integration
Oracle Hospitality

Oracle Validated Integration provides customers with confidence that a partner's integration with an Oracle on-premises application is functionally sound and performs as designed. This can help customers reduce deployment risk, lower total cost of ownership, and improve the user experience related to the partner's integrated offering.

Company Overview

Pesapal provides a simple, safe, and secure way for businesses to accept payments in Africa. We partner with credit card companies, banks, and mobile networks to give consumers as many payment options as possible. Pesapal offers ecommerce and point-of-sale (POS) payment processing support.

Powered by Pesapal, Sabi is a secure, advanced Point of Sale Platform that makes it easy for Hotels and Restaurants to integrate payments to offer real time reconciliation and minimize manual updates. Pesapal offers an Oracle Validated Solution to ensure full compatibility with current and future releases of Oracle Hospitality F&B solutions.

Integration Overview

The validated integration between Pesapal Sabi and Oracle Hospitality Food and Beverage Solutions such as Res and Simphony. Integrated to Oracle Payment Interface, Pesapal Sabi is a wireless payment solution that real time access to open checks on Simphony and Res. Table or Check information is entered into the Sabi Terminal is sent and saved to the merchants' Oracle Hospitality F&B solution. When the customer makes payments, Pesapal Sabi retrieves table information from Simphony or Res. This ensures that when payment is processed, transaction details are sent to Simphony or Res for immediate posting and reconciliation.

Integration Details

The integration enables the following:

- Table information can be retrieved by check or by table number via Waiter ID.
- Diners can split the bill by making partial payments towards a table or check balance.
- Recon can be done by comparing Res/Simphony, Pesapal Sabi and your Finance Dept.
